Environmental Policy

Non-Standard Socket Screw Limited is committed to enhancing its environmental performance, including the fulfilment of compliance obligations through the effective planning and continual improvement of environmental management system ISO 14001:2015.

The company is dedicated to protecting the environment by actively reducing its environmental impact. This includes efforts to prevent pollution and lower emissions across all operations. By implementing energy-efficient practices, using renewable energy sources, and adopting sustainable technologies, the company is working toward achieving Net Zero emissions.

Through continuous monitoring and improvement, the company strives to ensure its operations contribute to a cleaner, more sustainable future.

Environmental Objectives:

1. Lower Green House Gas emissions across all operations.
2. Ensure full compliance with all applicable environmental laws, regulations, standards, and contractual obligations through regular monitoring, audits, and staff training.
3. Minimise pollution by proactively identifying, controlling, and eliminating sources of air, water, and land contamination.
4. To increase the use of renewable energy across the site.
5. Reduce energy consumption by adopting energy efficient technologies, systems, and behaviours.
6. Reduce environmental footprint by reducing waste and conserving resources.
7. Enhance the effectiveness of the Environmental Management System through regular performance evaluations, audits and corrective actions.
